

AWAKE TO LOVE

Bring Hope to Women

Women in underserved communities face many challenges and risks related to their overall well-being. These challenges include human trafficking and unplanned pregnancy. Human trafficking is rampant worldwide, and it exists in every county in the Bay Area, where women are the most identified victims. Unplanned pregnancy is common, with about one in two pregnancies in the U.S. unplanned. In the rural parts of the Africa and Asia, over one million women suffer from untreated fistula and are cast out of their communities like lepers. These women often do not have any support, awareness, or access to proper healthcare options.
